

OCR

Today a reader, tomorrow a leader

For recognition of applied marking, automatic number identification system will be integrated for incoming quality and product control. The identification system is based on an Optical Character Recognition (OCR) system processed by Tebulo developed Deep Learning software. We define and convert the detected identification form the product in "text" which to be submitted.

Readability you wish you had sooner

To secure your several production stages, the OCR system is able of a numerous recognizing and reading capabilities. Constant detection of incoming products or throughout the process will increase the quality.

Flexible integration

Tebulo machine vision solutions are engineered for fertility. We understand the varying needs of the industries we serve and our products are designed for the flexibility to integrate into, even the most demanding environments. We have the expertise to find the most efficient, economical and productive way to get machine vision working for your business.

Benefits

- ✓ 24/7 automated performance
- ✓ Quality control
- ✓ Product Control
- ✓ Product recognizing
- ✓ Data matrix reading
- ✓ Laser etched reading
- ✓ Label reading
