

### An optical solution

To efficiently define strap position even when they are crossed, stacked, entangled and overlapping, the Optical Strap Recognizing is to be integrated in the destrapping or marking machine. Either for optimal strap removing or avoiding straps for marking.

### Flexible integration

Tebulo vision solutions are engineered for fertility. We understand the varying needs of the industries we serve and our products are designed for the flexibility to integrate into, even the most demanding environments. We have the expertise to find the most efficient, economical and productive way to get vision working for your business.
