

Machine Vision

Seeing is not as simple as looking

Machine vision will give your robot "eyes", making control possible, quality inspection and improve the efficiency of the production process. Based on by Tebulo developed Deep Learning software, even your most challenging tasks and process can be automated.

Recognition you wish you had sooner

To secure your several production stages, the vision system is able of a numerous measurement, recognizing and reading capabilities. Constant detection of incoming products or throughout the process will secure the quality.

Flexible integration

Tebulo machine vision solutions are engineered for fertility. We understand the varying needs of the industries we serve and our products are designed for the flexibility to integrate into, even the most demanding environments. We have the expertise to find the most efficient, economical and productive way to get machine vision working for your business.

Benefits

- ✓ Increased production speed
- ✓ Quality control
- ✓ Product Control
- ✓ Inspection
- ✓ Object detection
- ✓ Measurement detection
- ✓ 24/7 automated performance
- ✓ Label reading
- ✓ Data matrix reading
