

Manual Destrapping

Eliminate the risk of injury and loss

The Tebulo manual destrapping system is designed for safe manual cutting straps of coils, plate-, profile- or tube stacks and/or other packages. The simultaneous proven and patented cutting and clamping design of the manual tool prevents unsafe labour conditions and injuries by flung straps.

Flexible integration

Tebulo vision solutions are engineered for fertility. We understand the varying needs of the industries we serve and our products are designed for the flexibility to integrate into, even the most demanding environments. We have the expertise to find the most efficient, economical and productive way to get vision working for your business.

Benefits

- ✓ Two-handed safety control
- ✓ Low maintenance
- ✓ Simultaneously cutting and clamping of one side of the strap
- ✓ Less damages to coil surface
- ✓ Simple controls
- ✓ Closed hydraulic operating cutting process
- ✓ Easy to handle
- ✓ Suitable for circumferential and coil eye straps
- ✓ Operates with wall socket connection
